Skills

C# | .NET Core | ASP.NET Core

Angular | React | TypeScript

Node.js | JavaScript

SQL Server | Azure SQL | PostgreSQL

Azure PaaS | AWS | DevOps

CQRS | TDD | CI/CD
Agentic Dev | AI Tooling

Qualifications

Comprehensive Programming Diploma 2001

Over 20 years of industry experience developing software solutions.

Robbie Ribeiro

Principal Architect & Developer

Profile

Full-stack engineer and architect with 20+ years across the Microsoft .NET stack, contracting locally and internationally. I own systems end to end across diverse industries, from architecture and delivery through to production support. Recently extended into agentic software development, using AI-driven tooling to accelerate delivery and raise code quality.

Experience

Feb 2026 – Present · Fluenty IT
Principal Architect & Developer · Nigerian Payroll Platform

- Sole architect and developer of a live multi-tenant payroll platform: PAYE, statutory deductions, payslips and compliance reports
- Built an event-sourced .NET API on the Critter Stack (Wolverine and Marten on PostgreSQL)
- Implemented Nigerian statutory rules: PAYE, pension, NHF, NHIS, NSITF and ITF
- Built the Next.js web app, including an employee self-service portal
- Met GDPR and NDPA requirements: field-level encryption, audit logging and data retention
- Run AWS deployments (EKS, RDS, KMS) with Terraform; own releases and client support

Stack: **Critter Stack · Wolverine · Marten · Event Sourcing · .NET · PostgreSQL · Next.js · AWS**

Jun 2025 – Present · Fluenty IT
Principal Architect & Developer · Property Leasing Management System

- Own the technical roadmap and architectural decisions for a live multi-tenant leasing platform
- Act as sole technical point of contact for an actively used production system
- Extend the C# REST API and its custom dynamic-field design
- Maintain the CQRS implementation and AWS SQS-driven microservices
- Apply agentic AI tooling to accelerate delivery without trading away code quality

Stack: **C# · ASP.NET Core · CQRS · PostgreSQL · AWS SQS · React · Agentic AI tooling**

Mar 2023 – Jun 2025 · Fluenty IT
Senior Lead .NET Developer · Property Leasing Management System

- Led architecture and design for a greenfield multi-tenant property leasing CRM
- Built the C# REST API behind a custom dynamic-field design
- Applied CQRS to separate read and write paths
- Decoupled and scaled services with AWS SQS

Stack: **C# · .NET Core · CQRS · PostgreSQL · AWS SQS · Auth0**

Dec 2021 – Sep 2022 · Clifford Chance

Senior Full-Stack Developer (contract) · Partnership Services Management Application

- Modernised a global partner remuneration platform spanning multiple tax jurisdictions
- Migrated the front end to Angular 14 and re-architected the C# API to .NET 6
- Built new modules and hardened the existing codebase
- Extended unit and integration test coverage

Stack: **Angular 14 · C# · .NET 6 · CQRS · MS SQL · TDD**

Nov 2021 – Dec 2021 · DVT (Kantar)
Senior C# Developer (contract) · Kantar QA Automation Platform

- Built the API powering the Kantar QA automation platform's React front end
- Delivered to a tight timeline using test-driven development throughout

Stack: **C# · CQRS · Azure SQL · TDD**

Mar 2017 – Present · CodeStream
Partner & Software Developer · IoT SaaS Data Ingestion Platform

- Built an IoT SaaS platform handling high-volume data ingestion on Azure Functions and messaging
- Designed and ran CI/CD pipelines from Azure DevOps through to Azure PaaS

Stack: **C# · ASP.NET Core · Azure Functions · Azure Service Bus · Azure SQL · Azure B2C/B2B · TDD**

Mar 2017 – Jan 2022 · The SPAR Group
Senior Software Developer (contract) · Vendor Master Data Management UI & Central DataLake

- Led development of SPAR's central DataLake reporting database
- Migrated reporting systems to Azure using Data Factory and Synapse
- Built the vendor master data management user interface

Stack: **Azure PaaS · Azure SQL · Azure Data Factory · Azure Synapse · Angular · C#**

Jan 2012 – Mar 2017 · SMEasy
Senior Software Developer · Business Management & Accounting Application

- Senior developer at a FinTech start-up, building new modules for a SaaS product for small businesses

Stack: **C# · ASP.NET · SQL Server · Azure**

Earlier career: The Development House (2010–2012) · Eternal Digital Solutions, owner (2007–2010) · Khanyisa Computer Systems (2001–2006)
